

MAUCOUR now represents Wärtsilä products on the French territory. So you can directly contact us for your spare parts requirements but also the supply for original equipment on new ships.

WÄRTSILÄ FLOODGUARD

The Wärtsilä Floodguard range is a water lubricated face type seal suitable for both standard and high speed solutions. For gas tight requirements, we can also offer bespoke lip type design to suit custom specifications.

COMMERCIAL AND MILITARY BULKHEAD FACE TYPE SEALS

WFB1-F-M et WFB1-F-MS

The Wärtsilä Floodguard range has a long track record of performance in both military and commercial applications.

Should the vessel experience a flooded compartment, the self-activating Floodguard seal ensures that vessel integrity is maintained, allowing continued passage to dock.

The product range offers a variety of materials and configurations to suit shock requirements and high speed shafts.

Being fully split as standard, the seal enables maintenance and replacement without removing the shaft.

Shaft Ø	Ø50 to 680 mm
Serviceability	Fully split
Internal lubricant	Water
Max. draft pressure	2 bars
Optional extras	Light weight, high speed, dirt excluder, gas tight.
