

VARIPROFILE[®]
Hélices à mise en drapeau

The new Variprofile is the perfect feathering propeller for modern sailing boats and yachts up to 75 HP. Thanks to innovative design and mass production methods we can now offer the VARIPROFILE as an exceptional value, while continuing our tradition of highest quality standards. The interchangeable hub and blade assemblies always fit. Running under power is highly efficient and very quiet. The slim design reduces drag to the vanishing point and mounting is fast and easy for the average sailor, including customizing pitch separately for forward and reverse. SPW G.m.b.H. always combining latest technology with innovative design and precision engineering.

But the VARIPROFILE offers much more than that to make it an unsurpassed value:

- Hi-Tec blades with GAWN profile to optimize thrust and efficiency while running much more quietly than others
- Exceptional sailing characteristics through slim shape, light weight and GAWN profiled Hi-Tec blades.
- Separate external pitch adjustments for forward and reverse to optimize performance and eliminate prop-walk.
- Robust construction with enclosed helical gearing for long life
- Interchangeable hub
- Easy mounting for the average sailor
- Made out of Hi-Tensile NIBRAL-Bronze (Ice-Class)
- CNC machined for highest precision
- Available in 2-blade and 3-blade version up to 75 hp
